

# Material Handlers and Port Machinery

## T H WHITE Construction

T H WHITE has expanded its partnership with SANY by adding the Material Handlers and Port Machinery electric and diesel range to its portfolio.

Following its appointment as a SANY dealer earlier this year, the company has broadened its offering with access to specialist equipment for ports, recycling, waste management, aggregates and logistics operations.

The new range includes reach stackers, empty container handlers, heavy-duty forklifts, terminal tractors, material handlers and bespoke machinery solutions designed to meet a wide variety of operational requirements. The division will be led by Lewis Morgan, who brings extensive industry experience and will support customers with equipment selection, technical expertise and aftersales service.

With more than 190 years of machinery and engineering heritage, T H WHITE continues to invest in its product offering and specialist teams. The addition of SANY Material Handling and Port Machinery further strengthens the company's ability to deliver complete solutions across construction, material handling, recycling, waste and port operations, supporting customers with high-quality equipment backed by expert service and support.

## Powerful Material Handling Solution

SANY's electric & diesel Material Handling range is designed for lifting, moving and loading heavy materials in demanding environments such as ports, logistics hubs, recycling centres, waste facilities and aggregate sites. The range includes reach stackers, container handlers, heavy-duty forklifts, terminal tractors and material handlers.

Built for reliability, efficiency and high performance, SANY machines help businesses safely handle containers, bulk materials, scrap metal, waste and other heavy loads, improving productivity while reducing operating costs.

With a reputation for reliability and performance, SANY Material Handling equipment helps businesses improve efficiency and productivity across a wide range of industrial applications.

- ◆ High efficiency, low consumption
- ◆ Reinforced undercarriage stability
- ◆ Comprehensive security features

# Port Equipment For Every Tasks

## The SANY Range:

- ◆ Reach stackers
- ◆ Empty Container Handlers
- ◆ Heavy-Duty Forklifts
- ◆ Terminal Tractors
- ◆ Port Cranes and Container Handling Solutions

SANY is a global manufacturer of port and container-handling equipment, offering a comprehensive range of electric & diesel machines designed to improve efficiency, productivity, and safety in ports, intermodal terminals, logistics yards, and container storage facilities. The portfolio combines robust engineering, advanced control systems, and operator-focused designs to meet the demands of modern cargo-handling operations.

SANY's port equipment range provides a complete solution for container handling operations, from ship-side loading and unloading through to container transport, stacking, and storage, helping ports and logistics operators increase throughput while reducing operational costs.

## The Offering - electric & diesel

### Reach Stackers

SANY reach stackers are designed for fast, flexible handling of loaded containers, trailers, and heavy cargo. Delivering strong lifting performance, excellent manoeuvrability, and outstanding visibility, they are ideal for container terminals, rail yards, and logistics hubs. Advanced hydraulic and stability systems help maximise productivity while ensuring safe operation in demanding environments.

### Heavy-Duty Forklifts

SANY heavy-duty forklifts offer a versatile solution for handling breakbulk cargo, steel products, timber, project cargo, and containers. Combining powerful lifting performance with proven reliability, they are suitable for ports, manufacturing facilities, logistics centres, and industrial operations.

### Empty Container Handlers

SANY empty container handlers are engineered for high-density container yard operations. Offering impressive stacking heights, rapid cycle times, and precise control, these machines enable operators to move and stack empty containers efficiently while optimising available storage space. Models are available for both single and twin-container handling applications.

### Terminal Tractors

SANY's electric terminal tractors provide an environmentally friendly solution for container transportation within terminals and logistics yards. Designed for long operating hours and efficient yard movements, they help operators reduce emissions and operating costs while maintaining productivity and safe operation in demanding environments.

### Port Cranes and Container Handling Solutions

In addition to mobile handling equipment, SANY offers a range of port crane solutions, including Ship-to-Shore (STS) cranes, Rubber-Tyred Gantry (RTG) cranes, Rail-Mounted Gantry (RMG) cranes, and customised container crane systems. These products support efficient container loading, unloading, and yard management in ports worldwide.

# T H WHITE – Hands On Today: Eyes on Tomorrow

At T H WHITE we get the best from innovation using ingenuity and know-how to support livelihoods for generations.

We work alongside our customers to support and enhance their businesses.

We deliver innovative equipment solutions, expert aftersales support, and practical guidance to help businesses operate more efficiently and sustainably.

By combining engineering expertise with a customer-first approach, we provide exceptional quality, reliability, and value in everything we do.

Hands-on today. Focused on tomorrow.

## Why choose us

Powered by industry-leading engines from trusted brands such as Cummins and Volvo Penta, our equipment delivers the quality, reliability, and performance that customers expect from world-renowned manufacturers.

With faster lead times than many competitors, you can get the equipment you need sooner and keep your projects on schedule. Better still, our solutions offer 30 - 40% cost savings compared to comparable competitor machines, without compromising on quality, reliability, or performance, and often exceeding industry standards.
